Project Description: Art Swipe is a free iOS app loosely based on the Surrealist Exquisite Corpse parlor game. To create an Exquisite Corpse artists would write or draw on a folded sheet of paper and then pass that paper to the next participant for a further contribution. The result would be a collaborative artwork resulting in amazing connections that occurred by happenstance.

Art Swipe was conceived of with the idea of making meaning from the juxtaposition of unrelated elements and was created to coincide with the exhibition "In Wonderland: The Surrealist Adventures of Women Artists in Mexico and the United States" which was on view at the Los Angeles County Museum of Art from January 29 - May 6, 2012.

The app contains more than 100 artworks from LACMA's collection that are in the public domain and invites users to make their own Exquisite Corpses (three-part collages) by juxtaposing The LACMA images with a photograph taken with the phone's camera and/or with already saved on the device. The three-part collages can be also saved and shared.
