

# League of Imaginary Scientists

Artist: The League of Imaginary Scientists

Title: DIY Outer Space Settlement Telescope Kit and Let's Move Sticker Set

Date(s): 2007

Physical Description: foldable card stock telescope with printed color imagery, telescope lenses, color stickers

Distribution: The campaign was launched at Mutamorphosis in Prague in 2007, with 1000 sets distributed at the festival and to artists around the globe.

Project Description: With stickers, tape, and paper, the League of Imaginary Scientists unveiled their timely solution to an ecologically damaged and overpopulated planet: a DIY kit for developing outer space and settling the sea. The DIY environmental art kit includes a you-build-it telescope along with an infographics sticker set. The Let's Move campaign stickers describe social and environmental conditions leading to The League of Imaginary Scientists' push to relocate to another planet.
